

New Lignin Operation in Florida in Final Phase of Approval

June 28, 2016 5:00 PM ET

JACKSONVILLE, Fla.--(BUSINESS WIRE)--Jun. 28, 2016-- Borregaard (BRG) and Rayonier Advanced Materials (RYAM) have concluded a market, technical and engineering analysis regarding a new lignin operation at RYAM's Fernandina Beach site in Florida to serve the growing demand for natural lignin-based products. The final review of the investment by the companies' boards of directors is anticipated during the second half of 2016 upon receipt of final permits and incentives from government entities. If the companies elect to proceed, operations are expected to commence approximately 18 months later.

Cost of construction of the lignin plant is expected to be \$135 million over two phases of the project. Phase one, which will have a lignin capacity of 100,000 metric tons, is estimated to cost \$110 million. An estimated incremental \$25 million will be required in phase two to increase the total capacity to 150,000 metric tons. LignoTech Florida intends to access the debt markets to fund a portion of the capital requirements.

Lignin, a natural component of wood, is a co-product of the sulphite cellulose manufacturing process. The new operation will process the lignin into value-added products that provide environmentally friendly alternatives to fossil fuel-based products used globally in construction, agriculture and other industrial applications.

The new company, LignoTech Florida LLC, is to be owned 55 percent by Borregaard and 45 percent by RYAM.

About Rayonier Advanced Materials

Rayonier Advanced Materials is the leading global supplier of high-purity, cellulose specialties natural polymers for the chemical industry. Working closely with its customers, the Company engineers natural polymeric chemical chains to create dozens of customized high-purity performance fibers at its plants in Florida and Georgia. Rayonier Advanced Materials' intellectual property and manufacturing processes have been developed over 85 years, resulting in unique properties and very high quality and consistency. Upon completion of the previously announced strategic realignment of assets in Jesup, the Company's facilities will have the capacity to produce approximately 485,000 tons of cellulose specialties for use in a wide range of industrial and consumer products such as filters, cosmetics and pharmaceuticals and approximately 245,000 tons of commodity products. Rayonier Advanced Materials is consistently ranked among the nation's top 50 exporters and delivers products to 79 ports around the world, serving customers in 20 countries across five continents. More information is available at www.rayonieram.com.

About Borregaard ASA

Borregaard operates the world's most advanced biorefinery. By using natural, sustainable raw materials, Borregaard produces advanced and environmentally friendly biochemicals, biomaterials and bioethanol that replace oil-based products. The Borregaard Group has 1050 employees in 16 countries and had revenues in 2015 of approximately \$500 million. The lignin business constitutes close to 50% of the Group's turnover with plants in 7 countries.

Forward-Looking Statements

Certain statements in this document regarding anticipated financial, business, legal or other outcomes including business and market conditions, outlook and other similar statements relating to Rayonier Advanced Materials' future events, developments or financial or operational performance or results, are "forward-looking statements" made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and other federal securities laws. These forward-looking statements are identified by the use of words such as "may," "will," "should," "expect," "estimate," "believe," "intend," "anticipate" and other similar language. However, the absence of these or similar words or expressions does not mean that a statement is not forward-looking. While we believe that these forward-looking statements are reasonable when made, forward-looking statements are not guarantees of future performance or events and undue reliance

should not be placed on these statements. Although we believe that the expectations reflected in any forward-looking statements are based on reasonable assumptions, we can give no assurance that these expectations will be attained and it is possible that actual results may differ materially from those indicated by these forward-looking statements due to a variety of risks and uncertainties.

Other important factors that could cause actual results or events to differ materially from those expressed in forward-looking statements that may have been made in this document are described or will be described in our filings with the U.S. Securities and Exchange Commission, including our Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. Rayonier Advanced Materials assumes no obligation to update these statements except as is required by law.
